

PROFESSIONAL SUMMARY

Frontend developer focused on building responsive, polished, and user-focused websites using HTML, CSS, JavaScript, and Git/GitHub. Experienced with interactive UI components, mobile-friendly layouts, contact forms, animations, accessibility-minded design, and modern visual styling. Background in sales management, customer service, digital media, and game development brings strong problem-solving, communication, and creative technical skills.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript

Frontend: Responsive Design, DOM Manipulation, UI Components, CSS Animations

Tools: Git, GitHub, GitHub Pages, EmailJS, VS Code

Creative Tech: UI Design, Accessibility, Blender, Unity, C#

Soft Skills: Customer Service, Sales, Team Leadership, Problem Solving

Workflow: Communication, Time Management, Debugging, Documentation

PROJECTS

Portfolio Website

[HTML](#), [CSS](#), [JavaScript](#), [GitHub Pages](#)

- Built a responsive personal portfolio website to showcase frontend projects, skills, contact information, and professional branding.
- Developed interactive UI elements including glass-style cards, animated buttons, mobile navigation, scroll effects, and a contact modal.
- Implemented EmailJS contact form functionality with loading, success, and error states.
- Added mobile-focused interaction features, including motion-based glow effects and responsive navigation behavior.

Region Zero Website

[HTML](#), [CSS](#), [Responsive Design](#)

- Created a promotional website for an indie game project with multiple content sections, project branding, and polished visual presentation.
- Designed responsive layouts to support desktop and mobile viewing.
- Used modern styling, navigation structure, and visual hierarchy to present the project clearly to visitors.

Interactive UI Components

[JavaScript](#), [CSS](#), [UI Design](#)

- Built reusable frontend components including buttons, cards, menus, animations, hover effects, and responsive layout elements.
- Focused on clean structure, interactive behavior, and polished user experience.
- Practiced DOM manipulation and dynamic styling for real-time visual feedback.

E-Commerce Bookstore Website

[HTML](#), [CSS](#), [Responsive Design](#)

- Developed a responsive e-commerce style bookstore layout with product sections, pricing cards, navigation, and call-to-action elements.
- Designed the page to guide users toward browsing products and understanding available options.
- Applied clean spacing, layout consistency, and mobile-friendly styling.

Treect Landing Page

[HTML](#), [CSS](#), [Responsive Design](#)

- Recreated a modern SaaS-style landing page with hero section, customer trust area, pricing cards, and call-to-action layout.
- Practiced professional landing page structure, spacing, and responsive design patterns.

EXPERIENCE

Assistant / Sales Manager

Advance Auto Parts - Festus, MO | Mar 2022 - Aug 2025

- Assisted customers with product selection, troubleshooting, and service-related questions in a fast-paced retail environment.
- Supported store operations, sales goals, inventory organization, and daily workflow.
- Communicated technical information clearly to customers with different experience levels.
- Helped maintain a professional, organized, and customer-focused store environment.
- Strengthened leadership, problem-solving, communication, and time-management skills.

Correctional Officer

ERDCC - Bonne Terre, MO | Aug 2025 - Apr 2026

- Maintained safety, order, and professionalism in a high-pressure environment.
- Followed procedures, documented incidents, and communicated clearly with staff and supervisors.
- Developed strong attention to detail, reliability, conflict management, and decision-making skills.

EDUCATION

Frontend Simplified Institute

Frontend Development Program | 2026

- Studying frontend web development with a focus on HTML, CSS, JavaScript, responsive design, Git/GitHub, and professional portfolio development.

Mineral Area College

Some College Coursework | Aug 2017 - Oct 2019

ADDITIONAL EXPERIENCE

Independent Game Development

Unity, C#, UI, Systems Design

- Developed gameplay systems, procedural generation concepts, weapon behavior, UI elements, and project websites for an indie game project.
- Applied programming logic, debugging, visual design, and user experience thinking across technical and creative work.
